

# Light Palette VL

Building on Classic Palette, the Light Palette VL is our advanced moving light console. The Light Palette VL console adds 24 submasters and a 100 key direct action keypad. The direct action keypad speeds your production with direct selection of lights, positions, colors or any other attribute. Our abstract control model for automated lighting provides lighting control the way you design – pan 50 degrees, tilt 85 degrees, rotate gobo 3 are among the many commands available to you.

The Light Palette VL console's moving light effects generator and extensive fixture library mean that you can always get the most out of your moving light rig.

Light Palette VL Lighting Control Console

## Features

- High-resolution Graphical User Interface with integrated trackpad
- Microsoft Windows Operating System

**Introduction**

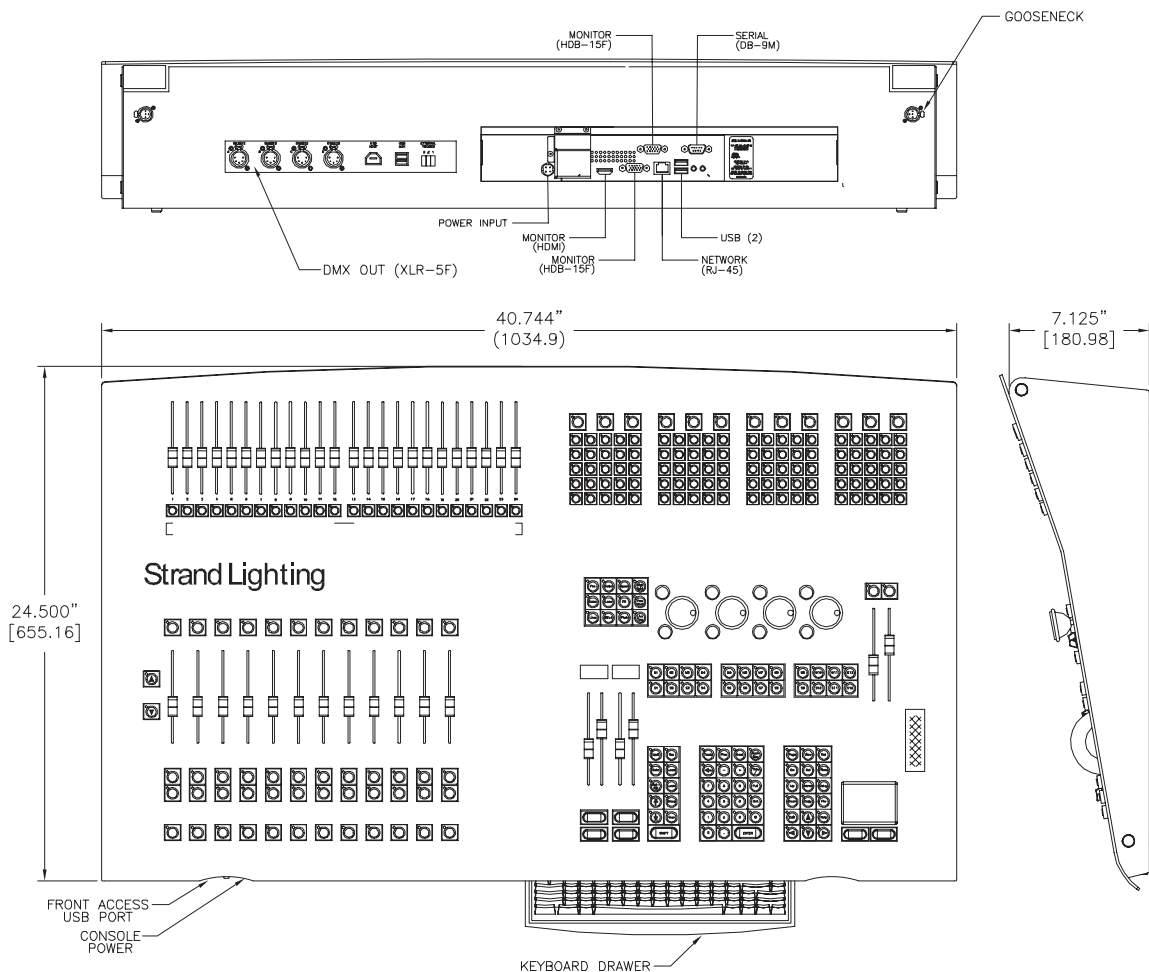

At last, the next generation of Light Palette consoles has arrived. Based on our powerful Palette OS with its direct action point and click graphical interface these new consoles offer control to meet productions of any size. Systems are available from 1500 to 8000 channels with over 65,000 DMX outputs providing exceptional range and control.

The Light Palette VL console has a powerful web browser that lets you configure and monitor your network and interact directly with Strand Lighting’s award-winning C21 and EC21 dimming systems. Right there on the console screen. And Light Palette VL is an elegant and highly functional lighting console, leveraging industry-standard technologies making it easy to communicate with other cool products (and not just ours) over the network. Whether you want to visualize

your show with WYSIWYG or run a PowerPoint projection Light Palette VL consoles connect quickly and easily.

And Light Palette VL console’s brain is a rugged industrial PC with a powerful Dual Core processor that could be swapped in seconds if you ever needed to. Which you most likely wouldn’t. Light Palette VL has an 80 gigabyte hard drive, or you can save your shows anywhere on the network. You even get a USB key for show storage over sneakernet. On us. How cool is that?

PaletteOffline runs in Windows and can import Strand 300 and 500 series show files, so you can mix, match and swap to your heart’s content.

Light Palette VL Lighting Control Console
